

## Benefits of Hosted Document Management

*Literally eliminate hardware and software from your business and let someone else worry about it! WorldView's service, servers, hardware and software reside at a remote, secure, expertly maintained data center.*

### Advantages of Hosted Document Management:

#### **Guaranteed Security, Backup, Disaster Recovery, and Uptime**

With WorldView, your documents are stored in a bunkered, off-site, data center outfitted with state of the art security features. Our specialists ensure multiple copies of your data are saved on redundant media – the perfect insurance policy against a disaster.

#### **Accessibility to Your Documents**

Each document is available to anyone who is an authorized user and has access to the Internet. Remote personnel and other locations now have access to documents that allow them to do their job more efficiently.

#### **Competitive Pricing**

With WorldView, your business saves on upfront hardware and software costs, installation time, and maintenance compared to an in-house system. Upfront costs are significantly (thousands of dollars) lower.

#### **Predictable Monthly Fees**

The WorldView solution lets you eliminate capital spending approval and replaces it with a budget-able monthly fee. So, you pay for the service as you profit from it.

#### **Lower Total Cost of Ownership**

The cost of expensive resources are shared across the entire WorldView customer base, creating a lower cost of ownership. The service solution is viable for large and small companies alike.

#### **Faster Deployment**

Solutions can be installed in a matter of days. For internal staff, the service solution provides substantial time savings compared to an in-house solution: with less training time and a fraction of the installation steps.

#### **Better Focus on Core Goals**

WorldView transforms hardware and software maintenance, upgrades, and changing technology into past worries. We help your staff focus on your core business while we maintain your document management system behind the scenes.

*Unlike IT staff that are often asked to support multiple complex systems, WorldView specialists are Certified Document Imaging Architects (CDIA) – trained professionals in the document management field.*
